CURRENT MEMBER COMPANIES

The basics

Commercial Definition

VR – Blocks out world

AR – see-thru overlay

In **Augmented Reality**, the world that you would normally see if you walked down the aisle without the screen is being **augmented – enhanced, supplemented, added to** - with additional data and experiences.

In **Virtual Reality** you are **virtually – nearly, almost** – but not really there in the grocery store aisle.

The AR – Reality – VR Continuum

Augmented Reality
Reality

Virtual Reality

Audio

Ascendance of Sound Spatial Audio

Microphone

Sound grounds us in the experience

It will be critically important as we get thrown into a 3D world

Spatial audio supports the illusion of reality in AR

Smarter Audio is coming

"layered listening,
directional hearing and
smart noise filters."
Here One, by Doppler Labs

Nuheara IQbuds by Nuheara

- Advanced speech amplification
- Dynamic noise control
- Blended worlds

User Experience

User Interface Design

Sense of Presence

Heightened Sense of Empathy

Agency

AR Presence Plausibility Illusion

A close-up photograph of a white ceramic teapot pouring a stream of amber-colored tea into a matching white cup. The cup sits on a white saucer, and a silver spoon rests on the saucer to the right. The background is dark and out of focus.

Agency Interactions feel natural

How do you make a cup of tea?

- Water in cup then tea
- Tea bag in cup then water
- Tea bag in tea pot then boil
-

If the world makes you guess how to accomplish something, then it breaks the plausibility illusion and becomes a game.

User Interface and Interactivity

Game Engines

UI design should maintain presence

User Interface Design

Hand Tracking

Intel RealSense

UI – Voice Recognition

Social & Group AR experiences

- The soul of geo-location AR is the social experience and how it augments people's lives.
- Why can't the real world take on the qualities of a theme park? You are in the experience, moving from portal to portal.
- There is no tutorial. We encourage people to interact with each other.
- The best avatar is a real human.

Growing Elderly Population Creates New Opportunities for Technology

Frame from video

An array of tech companies are rolling out new products for aging baby boomers.

WSI

Erasing the boundaries between real and virtual worlds of work and play

Redefining reality

A man wearing a VR headset stands next to a low-poly, orange-colored digital avatar in a virtual environment. The man is wearing a grey long-sleeved shirt and a grey scarf. The avatar has long, wavy hair and is wearing a low-poly, orange-colored suit. The background is a blurred virtual environment with some architectural elements.

Where do 'I' begin and end?
What is public vs private information?
How do I know what only I experience?

Frame from video

We already live in a constructed environment, so the idea the Virtual and Augmented Reality could be more or less real is a complicated question.

“The culture is ready for [VR+AR] now,
given the amount of tech that we touch right now
and the devices that we use daily.”

Ted Schilowitz, Futurist, Fox Studio

Consumers don't buy technologies,
they buy the experiences that the
technologies deliver

Frame from video

Netflix Vista
Your life is a movie
Go out and watch it

Be creative and innovative
But consider the consequences

Thank You
